Geoffrey P. DOBSON

Serial No.: 09/937,181

Filed: January 10, 2002

For: ORGAN ARREST, PROTECTION AND  
PRESERVATION

Art Unit: 1651

Examiner: R.A. Davis

Atty. Docket No.: 36749-200650

Customer No.

26694

PATENT TRADEMARK OFFICE

**COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

Pursuant to MPEP 1302.14, and in addition to the issue fee transmittal filed under separate cover, applicant hereby submits the following Comments on Statement of Reasons for Allowance.

In the Notice of Allowance, mailed September 3, 2004, the Examiner states: "The prior art teaches administering potassium channel openers and anesthetics individually and in combination therapies for protecting the heart against myocardial infarctions. However the art does not teach a single composition comprising both the potassium channel openers and local anesthetics, in amounts sufficient to arrest the heart."

The applicant does not believe the prior art teaches administering potassium channel openers and anesthetics in combination therapies for protecting the heart, including protecting the heart from myocardial infarctions.

Respectfully submitted,

Michael A. Gollin
